LS-1102

Its threefold symmetric design and the thin CC-195 cores attains low levels of inductivity and a very low and linear resistance progression. At the same time, the cable cross section which is larger overall, ensures an excellent level of efficiency.

Speaker Cable

LS-1002

The LS-1002 is also a double-symmetric design loudspeaker cable. The CC-309 cores are thicker than those used in the LS-602 giving it a wider base. The LS-1002 is a very dynamic, powerful cable and greatly increases the "fun factor" when listening to music.

LS-602

This model uses a double-symmetric design with four cores – the so-called Quattro CC-195 design. The high density of the CC-195 cables reduces the unwanted inductive factor to the benefit of the medium and high-frequency ranges. This cable is a genuine ex
